THE PERFECT BRACKET FOR ANY JOB ON ANY WALL!

Whether you just want to add some decorative shelves, or you're looking to add some extra storage space, Stronghold Brackets are easy to install and strong enough to hold the weight!

Customer Testimonial:

I have installed custom cabinets for the last 25 years. In the last 10 to 15 years I have installed many Floating Vanities and Floating Shelves. In an attempt to attach these Floating cabinets & Shelves as securely as possible, I have tried several dif erent ideas. I have tried Metal Brackets that surface mount to the sheetrock wall. I have even cut the sheetrock out and installed long metal bars with metal rods welded to them, directly to the studs. Nothing has worked. Anything I have "surface mounted" has always had deflection at the front of the shelf. And any exposed front corner of a Floating Vanity has always sagged. I even tried "Flag" shaped metal brackets. These hold the weight just fine, but require a large hole in the wall, big enough for the bracket and my screw gun to attach to the side of the stud. This meant I had to pay someone to fix the hole in the wall, and repaint.

Then I started using Stronghold Brackets. These hold the weight just fine, and do not require any wall repair or paint. The install takes only minutes, and doesn't require any special tools.

I am sold!! And will use these for all of my future projects.

- Steve

Floating Shelf Brackets

- Innovative floating shelf brackets post sheetrock installation eliminates the need to patch and repaint sheet rock
- "U" shaped design allows for easy install after sheetrock with only a 2" x 2" hole
- Front holes at top and bottom allow for easy install and leveling
- Bar placed concrete down 5/8" from top of shoe, allows for 3/4" thick material to sit on top of bracket and hide the top of the hole
- 1/2" tube steel bars welded to "U" bracket to allow plenty of support for heavy items
- 1/2" tube allows for 2-1/4" thick, low profile shelf to slide over and still hide hole
- Patent Pending

Floating Shelf Bracket, Concrete Walls

- Floating Shelf bracket but for walls that are concrete or brick
- Pre-drill into your wall and then use a concrete screw to install the bracket
- This bracket will be completely hidden by a 2-1/4" thick shelf
- No need to worry about your shelves sagging or falling off the wall

Item #	Weight Cap
SHBCFS-10	150 lb

Floating Vanity Brackets

- Innovative floating shelf brackets post sheetrock installation eliminates the need to patch and repaint sheet rock
- “U” shaped design allows for easy install after sheetrock with only a 2” x 2” hole
- Front holes at top and bottom allow for easy install and leveling
- Bar placoncrete down 5/8” from top of shoe, allows for 3/4” thick material to sit on top of bracket and hide the top of the hole
- 3/4” tube steel bars welded to “U” bracket to allow plenty of support for heavy items
- 3/4” tube allows for extra weight of floating vanity to be easily supported even with heavy granite or concrete counter tops
- Support bar can be cut to length as needed
- Accessory kit available, includes 1 Wall Cover, 1 End Cap, and 1 Mid Clip
- Patent Pending
