Note about sandpaper: The long-time supplier of ET sandpaper had a fire and did not reopen. The new supplier provided 80 grit, which performs like 100 grit. We now have 60 grit, which performs like 80 Grit. The back of the disc will be stamped 60 and 80, but the package will be labeled ET 80 Grit and ET 100 Grit.

The new sandpaper was tested in three local cabinet shops, and they all indicated our new 80 and 100 are better than the old; it's just confusing! October 2019.
