### Section 2. Hazards identification

| OSHA/HCS status                | : This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).   |
|--------------------------------|---|
| Classification of the          | : FLAMMABLE LIQUIDS - Category 3  |
| substance or mixture           | TOXIC TO REPRODUCTION (Fertility) - Category 2<br>TOXIC TO REPRODUCTION (Unborn child) - Category 2   |
| GHS label elements             |   |
| Hazard pictograms              |   |
| Signal word                    | : Warning   |
| Hazard statements              | : Flammable liquid and vapor.<br>Suspected of damaging fertility or the unborn child.   |
| Precautionary statements       |   |
| General                        | : Read label before use. Keep out of reach of children. If medical advice is needed, have product container or label at hand.   |
| Prevention                     | : Obtain special instructions before use. Do not handle until all safety precautions have<br>been read and understood. Use personal protective equipment as required. Wear<br>protective gloves. Wear eye or face protection. Keep away from heat, sparks, open<br>flames and hot surfaces No smoking. Use explosion-proof electrical, ventilating,<br>lighting and all material-handling equipment. Use only non-sparking tools. Take<br>precautionary measures against static discharge. Keep container tightly closed. |
| Response                       | : IF exposed or concerned: Get medical attention. IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water or shower.  |
| Date of issue/Date of revision | : 7/29/2015. Date of previous issue : 7/25/2015. Version : 1.05 1/11  |

### Section 2. Hazards identification

| Storage               | : Store locked up. Store in a well-ventilated place. Keep cool.   |
|-----------------------|---|
| Disposal              | : Dispose of contents and container in accordance with all local, regional, national and international regulations. |
| Hazards not otherwise | : None known.   |

#### classified

NOTICE: Reports have associated repeated and prolonged OVEREXPOSURE to solvents with permanent brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling the contents of this package may be harmful or fatal.

### Section 3. Composition/information on ingredients

| Substance/mixture | : | Mixture        |
|-------------------|---|----------------|
| Other means of    | ÷ | Not available. |
| identification    |   |                |

#### **CAS number/other identifiers**

| CAS number   | : Not applicable. |
|--------------|-------------------|
| Product code | : 825-4900        |
|              |                   |

| Ingredient name   | % | CAS number |
|---|---|------------|
| petroleum hydrocarbon<br>octamethylcyclotetrasiloxane<br>decamethylcyclopentasiloxane |   | -          |

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

### Section 4. First aid measures

| Description of necessary firs | aid measures  |
|-------------------------------|---|
| Eye contact                   | : Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention if irritation occurs.  |
| Inhalation                    | : Remove victim to fresh air and keep at rest in a position comfortable for breathing. If<br>not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial<br>respiration or oxygen by trained personnel. It may be dangerous to the person providing<br>aid to give mouth-to-mouth resuscitation. Get medical attention. If unconscious, place<br>in recovery position and get medical attention immediately. Maintain an open airway.<br>Loosen tight clothing such as a collar, tie, belt or waistband.   |
| Skin contact                  | : Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Continue to rinse for at least 10 minutes. Get medical attention. Wash clothing before reuse. Clean shoes thoroughly before reuse.  |
| Ingestion                     | : Wash out mouth with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. |
| Most important symptoms/ef    | ects, acute and delayed   |
| Potential acute health effect | <u>s</u>  |
| Eye contact                   | : No known significant effects or critical hazards.   |

### Section 4. First aid measures

| Section 4. First al         |  |  |  |
|-----------------------------|--|--|--|
| Inhalation                  | : No known significant effects or critical hazards.  |  |  |
| Skin contact                | No known significant effects or critical hazards.  |  |  |
| Ingestion                   | : No known significant effects or critical hazards.  |  |  |
| Over-exposure signs/symp    | <u>otoms</u>   |  |  |
| Eye contact                 | : No specific data.  |  |  |
| Inhalation                  | : Adverse symptoms may include the following:<br>reduced fetal weight<br>increase in fetal deaths<br>skeletal malformations  |  |  |
| Skin contact                | : Adverse symptoms may include the following:<br>reduced fetal weight<br>increase in fetal deaths<br>skeletal malformations  |  |  |
| Ingestion                   | : Adverse symptoms may include the following:<br>reduced fetal weight<br>increase in fetal deaths<br>skeletal malformations  |  |  |
| Indication of immediate med | dical attention and special treatment needed, if necessary   |  |  |
| Notes to physician          | <ul> <li>Treat symptomatically. Contact poison treatment specialist immediately if large<br/>quantities have been ingested or inhaled.</li> </ul>                          |  |  |
| Specific treatments         | : No specific treatment.   |  |  |
| Protection of first-aiders  | : No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. |  |  |

### See toxicological information (Section 11)

### Section 5. Fire-fighting measures

| Extinguishing media                            |   |
|--|---|
| Suitable extinguishing media                   | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.  |
| Unsuitable extinguishing media                 | : Do not use water jet.   |
| Specific hazards arising from the chemical     | : Flammable liquid and vapor. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. Runoff to sewer may create fire or explosion hazard. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain. |
| Hazardous thermal decomposition products       | : Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>sulfur oxides<br>halogenated compounds<br>metal oxide/oxides  |
| Special protective actions for fire-fighters   | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.                              |
| Special protective equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.   |

: 7/25/2015.

# Section 6. Accidental release measures

| Personal precautions, protec   | tive equipment and emergency procedures  |
|--------------------------------|--|
| For non-emergency<br>personnel | : No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Shut off all ignition sources.<br>No flares, smoking or flames in hazard area. Avoid breathing vapor or mist. Provide<br>adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put<br>on appropriate personal protective equipment.  |
| For emergency responders       | : If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".  |
| Environmental precautions      | : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains<br>and sewers. Inform the relevant authorities if the product has caused environmental<br>pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to<br>the environment if released in large quantities.  |
| Methods and materials for co   | ntainment and cleaning up  |
| Small spill                    | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.  |
| Large spill                    | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal. |

# Section 7. Handling and storage

| Precautions for safe handling                                      | 1  |   |   |   |   |   |
|--|--|---|---|---|---|---|
| Protective measures  | obtain sp<br>handle ur<br>or on skir<br>the enviro<br>ventilation<br>adequate<br>from a co<br>from heat<br>electrical<br>tools. Ta | propriate personal protect<br>ecial instructions before us<br>ntil all safety precautions ha<br>or clothing. Do not inges<br>onment. Use only with ade<br>is inadequate. Do not er<br>ly ventilated. Keep in the<br>mpatible material, kept tig<br>s, sparks, open flame or ar<br>(ventilating, lighting and m<br>ke precautionary measure<br>duct residue and can be h | se. Avoid exposure durate been read and und<br>t. Avoid breathing vape<br>equate ventilation. Store<br>rials. Keep<br>nave been<br>Do not sto  | ilated                                    |
| Date of issue/Date of revision                                     | : 7/29/201   | 5. Date of previous issue   | : 7/25/2015.  | Version   | : 1.05  | 4/11                                      |

# Section 8. Exposure controls/personal protection

#### Control parameters

#### Occupational exposure limits

None.

| Appropriate engineering controls | : Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment. |
|----------------------------------|---|
| Environmental exposure controls  | : Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process equipment<br>will be necessary to reduce emissions to acceptable levels.   |

#### Individual protection measures

| Hygiene measures       | <ul> <li>Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.</li> <li>Selection of personal protective equipment (PPE) is to be established by the employer performing a PPE hazard assessment. In the U.S.A, OSHA requires completion of a</li> </ul>                                 |
|------------------------|--|
|                        | documented PPE hazard assessment as described in 29 CFR 1910.132.  |
| Eye/face protection    | : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.  |
| Skin protection        |  |
| Hand protection        | : Chemical-resistant, impervious gloves complying with an approved standard should be<br>worn at all times when handling chemical products if a risk assessment indicates this is<br>necessary. Considering the parameters specified by the glove manufacturer, check<br>during use that the gloves are still retaining their protective properties. It should be<br>noted that the time to breakthrough for any glove material may be different for different<br>glove manufacturers. In the case of mixtures, consisting of several substances, the<br>protection time of the gloves cannot be accurately estimated. |
| Body protection        | : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of ignition from static electricity, wear anti-static protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves.  |
| Other skin protection  | : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.  |
| Respiratory protection | : Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.  |
|                        | Dry sanding, flame cutting and/or welding of the dry paint film will give rise to dust and/<br>or hazardous fumes. Wet sanding/flatting should be used wherever possible. If<br>exposure cannot be avoided by the provision of local exhaust ventilation, suitable<br>respiratory protective equipment should be used.   |

### Section 9. Physical and chemical properties

| Appearance                                   |   |
|--|---|
| Physical state                               | : Liquid.   |
| Color  | : Not available.  |
| Odor   | : Not available.  |
| рН   | : Not available.  |
| Melting point                                | : Not available.  |
| Boiling point                                | : 149 - 213 ℃ (300.2 - 415.4 F)                                       |
| Flash point                                  | : Closed cup: 41℃ (105.8℉)  |
| Evaporation rate                             | : Not available.  |
| Lower and upper explosive (flammable) limits | : Lower: 1% Upper: 7%   |
| Vapor pressure                               | : 0.5 mm Hg (0.0665 kPa) (Highest known value: petroleum hydrocarbon) |
| Vapor density                                | : > 1 (Air = 1) (Calculation method)                                  |
| Volatility                                   | : 63.05% (w/w)  |
| Density                                      | : 0.934 g/cm <sup>3</sup>   |
| Solubility                                   | : Not available.  |
| Partition coefficient: n-<br>octanol/water   | : Not available.  |
| Decomposition temperature                    | : Not available.  |
|  |   |

### Section 10. Stability and reactivity

| Reactivity                         | : No specific test data related to reactivity available for this product or its ingredients.  |
|------------------------------------|---|
| Chemical stability                 | : The product is stable.  |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.   |
| Conditions to avoid                | : Avoid all possible sources of ignition (spark or flame). Do not pressurize, cut, weld, braze, solder, drill, grind or expose containers to heat or sources of ignition. |
| Incompatible materials             | : Reactive or incompatible with the following materials:<br>oxidizing materials   |
| Hazardous decomposition products   | : Under normal conditions of storage and use, hazardous decomposition products should not be produced.  |

### Section 11. Toxicological information

#### Information on toxicological effects

| Acute toxicity          |   |                      |  |                   |  |  |

## Section 11. Toxicological information

#### Not available.

| General               | : No known significant effects or critical hazards. |
|-----------------------|---|
| Carcinogenicity       | : No known significant effects or critical hazards. |
| Mutagenicity          | : No known significant effects or critical hazards. |
| Teratogenicity        | : Suspected of damaging the unborn child.           |
| Developmental effects | : No known significant effects or critical hazards. |
| Fertility effects     | : Suspected of damaging fertility.                  |

### Section 12. Ecological information

Data available upon request.

### Section 13. Disposal considerations

| Disposal methods | : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. |
|------------------|--|
|                  | ,  |

Disposal should be in accordance with applicable regional, national and local laws and regulations.

#### Hazardous Material Information System (U.S.A.)

Caution: HMIS® ratings are based on a 0-4 rating scale, with 0 representing minimal hazards or risks, and 4 representing significant hazards or risks Although HMIS® ratings are not required on SDSs under 29 CFR 1910. 1200, the preparer may choose to provide them. HMIS® ratings are to be used with a fully implemented HMIS® program. HMIS® is a registered mark of the National Paint & Coatings Association (NPCA). HMIS® materials may be purchased exclusively from J. J. Keller (800) 327-6868.

The customer is responsible for determining the PPE code for this material.
