2. Hazards id	entification				
Eyes	: Corrosive to eyes. Cause	s burns.			
		Other effects of eye contact may include : blindness, blurred vision, burning, eye damage, redness, swelling, tearing,			
Potential chronic health	<u>effects</u>				
Carcinogenicity	: Contains material which m depends on duration and l	ay cause cancer, based on animal data. Risk of ca	ancer		
Mutagenicity : No known significant effects or critical hazards.		ts or critical hazards.			
Teratogenicity : No known significant effects or critical hazards.					
Target organs	: Contains material which m lungs, liver, skin, central n	ay cause damage to the following organs: blood, ki ervous system (CNS).	idneys,		
Medical conditions aggravated by over- exposure	: pulmonary conditions, skir	n disorders, liver conditions, respiratory conditions,			

NOTICE: Reports have associated repeated and prolonged OVEREXPOSURE to solvents with permanent brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling the contents of this package may be harmful or fatal.

See toxicological information (Section 11)

3. Composition/information on ingredients

Name Titanium dioxide	CAS number % by weight 13463-67-7	Vapor pressure Not available.	Exposure limits
ETHYL ALCOHOL	64-17-5	7.9 kPa (59.3 mm Hg) [20℃]	ACGIH TLV (United States). STEL: 1000 ppm 15 minute(s). OSHA PEL (United States). TWA: 1000 ppm 8 hour(s).
Isopropanol	67-63-0	4.4 kPa (33 mm Hg) [20℃]	ACGIH TLV (United States). TWA: 200 ppm 8 hour(s). STEL: 400 ppm 15 minute(s). OSHA PEL (United States). TWA: 400 ppm 8 hour(s).
2-dimethylaminoethanol	108-01-0	0.59 kPa (4.4 mm Hg) [20℃]	

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

4. First aid measures **Protection of first-aiders** No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. : Get medical attention immediately if symptoms occur. Check for and remove any Eye contact contact lenses. Immediately flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and lower eyelids. Chemical burns must be treated promptly by a physician. : Get medical attention immediately if symptoms occur. In case of contact, immediately Skin contact flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Wash clothing before reuse. Clean shoes thoroughly before reuse. Chemical burns must be treated promptly by a physician. Get medical attention immediately if symptoms occur. Move exposed person to fresh Inhalation air. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. Loosen tight clothing such as a collar, tie, belt or waistband. Material Safety Data Sheet Continued on next page

Flammable limits	: Lower: 2% Upper: 19%					
Extinguishing media						
Suitable	: Use dry chemical, CO ₂ , water spray	(fog) or foam.				
Not suitable	: Do not use water jet.					
Special exposure hazards	there is a fire. No action shall be ta	ving all persons from the vicinity of the ind ken involving any personal risk or without area if this can be done without risk. Use rs cool.	t suitable			
Hazardous thermal decomposition products	: Decomposition products may includ carbon dioxide carbon monoxide nitrogen oxides metal oxide/oxides	e the following materials:				
Special protective equipment for fire-fighters		e protective equipment and self-containe ece operated in positive pressure mode.				
-		emergency conditions, overexposure to card; symptoms may not be immediately a				
Special remarks on fire hazards	: Not available.					
Special remarks on explosion hazards	: Not available.					

6. Accidental release measures

Personal precautions		No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Do not breathe vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment (see Section 8).
Environmental precautions	:	Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).
Methods for cleaning up		
Small spill	1	Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dispose of via a licensed waste disposal contractor.

6. Accidental release measures

1.0	rqe		nill
La	ge	3	pill

: Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see section 13). Use spark-proof tools and explosion-proof equipment. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product.

7. Handling and storage

Handling

: Put on appropriate personal protective equipment (see Section 8). Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Persons with a history of asthma, allergies or chronic or recurrent respiratory disease should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not breathe vapor or mist. Do not ingest. Use only with adequate ventilation. Do not enter confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use non-sparking tools. Take precautionary measures against electrostatic discharges. To avoid fire or explosion, dissipate static electricity during transfer by grounding and bonding containers and equipment before transferring material. Empty containers retain product residue and can be hazardous. Do not reuse container.

Storage

: Store in accordance with local regulations. Store in approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see section 10) and food and drink. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

8. Exposure controls/personal protection

Engineering measures	: Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.
Hygiene measures	: Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.
Personal protection	Selection of personal protective equipment (PPE) is to be established by the employer performing a PPE hazard assessment. In the U.S.A, OSHA requires completion of a documented PPE hazard assessment as described in 29 CFR 1910.132.
Respiratory	: Use properly fitted respiratory protection complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. Dry sanding, flame cutting and/or welding of the dry paint film will give rise to dust and/or hazardous fumes. Wet sanding/flatting should be used wherever possible. If exposure cannot be avoided by the provision of local exhaust ventilation, suitable respiratory protective equipment should be used.

8. Exposure	controls/personal protection
Hands	: Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.
Eyes	 Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists or dusts.
Skin	: Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
Other protection	: Not available.

9. Physical and	chemical properties
Physical state	: Liquid.
Burning time	: Not applicable.
Burning rate	: Not applicable.
Color	: Not available.
Odor	: Not available.
Taste	: Not available.
Molecular weight	: Not applicable.
Molecular formula	: Not applicable.
рН	: 9 to 9.4
Boiling/condensation point	: 78.89 to 136.11℃ (174 to 277年)
Melting/freezing point	: Not available.
Critical temperature	: Not available.
Relative density	: 1.28
Vapor density	: Heavier than air
Volatility	: 55% (w/w)
Odor threshold	: Not available.
Evaporation rate	: Highest known value: Greater than 1. (ETHYL ALCOHOL) compared with butyl acetate
Viscosity	: Not available.
lonicity (in water)	: Not available.
Dispersibility properties	: Not available.
Solubility	: Not available.

10. Stability and reactivity

-	•
Chemical stability	: The product is stable, under normal conditions of storage and use.
Hazardous polymerization	: Will not undergo hazardous polymerization.
Conditions to avoid	: Avoid all possible sources of ignition (spark or flame). Do not pressurize, cut, weld, braze, solder, drill, grind or expose containers to heat or sources of ignition. Other Conditions to avoid: freezing, light, moisture, allow air blanket above liquid, drying out,
Materials to avoid	: Reactive or incompatible with the following materials: oxidizing materials, metals, acids and alkalis.
Hazardous decomposition products	: Not available.
Possibility of hazardous reactions	: Under normal conditions of storage and use, hazardous reactions will not occur.

Carcinogenicity				
Product/ingredient name		IARC	NTP	OSHA
Titanium dioxide		2B	-	-

IARC has issued a notice that they will publish a monograph that lists titanium dioxide (TiO2) as possibly carcinogenic to humans (Group 2B) by inhalation (based solely on animal data). Human epidemiology studies do not suggest an increased risk of cancer in humans for occupational exposure to titanium dioxide. According to the IARC summary on titanium dioxide, "No significant exposure to titanium dioxide is thought to occur during the use of products in which titanium dioxide is bound to other materials, such as paint."

Teratogenicity Product/ingredient name Not available.	Result	Species	Dose	Exposure

12. Ecological information

Data available upon request.

13. Disposal considerations

Waste disposal

: The generation of waste should be avoided or minimized wherever possible. Significant quantities of waste product residues should not be disposed of via the foul sewer but processed in a suitable effluent treatment plant. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Disposal should be in accordance with applicable regional, national and local laws and regulations.

16. Other information

HMIS III ® Hazardous Material Information System (U.S.A.)

Caution: HMIS III ® ratings are based on a 0-4 rating scale, with 0 representing minimal hazards or risk, and 4 representing severe hazards or risk. Although HMIS III ® ratings are not required on MSDSs under 29 CFR 1910.1200, the preparer may choose to provide them. HMIS III ® ratings are to be used with a fully implemented HMIS III ® program. HMIS III ® is a registered mark of the National Paint & Coatings Association (NPCA).

The customer is responsible for determining the PPE code for this material.
