

# PC100

## PRODUCTION POCKET CUTTER

The Cantek PC100 Production Pocket Cutter allows for fast and efficient creation of strong, stable pocket joints. The machining cycle is actuated using a convenient foot pedal which actuates a pneumatic clamp to hold the material firmly in place, then mills a low-angle pocket, and finally drills a pilot hole. All of this happens in a fast cycle time of just 1.5 to 2 seconds! The sturdy table can be easily lifted to provide access to the router and drill for fast and convenient tool changes. The robust structure & convenient design ensure the PC100 pocket cutting machine can thrive in production environment.

### Key Advantages.

- Automated operation with a simple to use foot pedal
- Drills a pilot hole with a simple tap of the foot pedal in just 2 seconds
- Sturdy machine design for continuous operation
- Quick bit change feature
- low angle pocket hole design reduces the need for clamping
- Pneumatic clamp holds work piece firmly in place
- Built-in 4" dust port
- Adjustable clear guard for safe operation

### Specifications.

Total HP	1HP x 2 (710 W x 2)
Table size	15" x 31"
Electrical	110V / 1 Phase / 60 Hz   13 Amps
Table height	35"
Machine dimensions (LxWxH)	33" x 32" x 46"
Weight	205 lbs
Shipping dimensions	33" x 24.4" x 47"
Shipping weight	230 lbs
