

READY TO POWER UP YOUR OPERATION?

Every Altura 4-in-1 unit is engineered for clean air, long life, and low downtime. Backed by expert support and responsive parts availability from our U.S.-based team.

Why 4-in-1?

Because Simplicity Wins.

One compact cabinet. Four built-in functions: rotary screw air compressor, refrigerated dryer, dual filtration, and horizontal tank. Our 4-in-1 design saves space, reduces install time, lowers maintenance, and delivers premium air quality to every machine in your shop.

IDEAL FOR:

- CNC Routers
- Cabinetry Tools
- Dust Systems
- Finishing Equipment

PERFORMANCE.
PRECISION.
PEACE OF MIND.

We're here to help you
make the right move.

Altura Precision
4-in-1 Rotary Screw Air Compressors

Unleash continuous power, clean air, and compact efficiency. Altura's 10hp, 15hp, and 20hp 4-in-1 compressors deliver quiet performance and industrial durability in one self-contained unit—built for today's CNC and finishing operations.

NEED TO FINANCE?

Finance is available with our 36, 48, & 60-month payment plans:

10HP Model	\$7,999	Finance as low as \$176 / month
15HP Model	\$9,999	Finance as low as \$218 / month
20HP Model	\$12,999	Finance as low as \$280 / month

10HP4-in-1 AirSystem

Perfect for Lean Growing Shops.
Entry- to mid-level shops

Small footprint, low noise, and reliable air volume. This 10 HP unit is built for shops upgrading from piston compressors.

15HP4-in-1 AirSystem

Built for High-Demand Days.
Mid- to high-level shops

A workhorse for busy fabrication and finishing floors. Handles multi-zone operations and peak hour workloads with ease. Low-maintenance and quiet for its class.

20HP4-in-1 AirSystem

Power for Production-Grade Shops.
High-level shops

For manufacturers running CNC routers, finish booths, and dust collectors all at once. Peak performance, continuous duty cycle, and top-tier air quality in a single unit.

SPECS SNAPSHOT:

- 7.5kW / 10HP
- 38 CFM @ 145 PSI
- 80 gallon tank
- Plug & play setup

SPECS SNAPSHOT:

- 11kW / 15HP
- 58 CFM @ 145 PSI
- 80 gallon tank
- Plug & play setup

SPECS SNAPSHOT:

- 15kW / 20HP
- 75 CFM @ 145 PSI
- 132 gallon tank
- Plug & play setup

*All Air Systems come with 4x Air Filter Elements; 4x Air/Oil Separators; 5x Oil Filters. Ready for thousands of hours of worry-free use.
