

WARNING

Do not use any glue with temperatures above 180° Celsius / 356° Fahrenheit nor glue with temperatures lower than 130° Celsius / 266° Fahrenheit. This machine will only work correctly if the proper glue is used.

Proper glue should have an average temperature between 130° to 180° Celsius / 266° to 356° Fahrenheit and be pellet glue. We recommend the following glues:

- Jowat White color (ref. 282.21)
- Jowat Natural color (ref. 282.20)

- Kleiberit Ivory color (ref. 788.3/20)
- Kleiberit White color (ref. 788.3/10)

**Any brand of pellet glue with temperatures between
130° to 180° Celsius / 266° to 356° Fahrenheit**

You can use glue from other brands as long as it has an average temperature rating between 130° to 180° Celsius / 266° to 356° Fahrenheit and as long as it is pellet glue. **Damage as a result of incorrect glue may result in the warranty being voided.**
