

WARNING CBC.T

Do not use any glue with temperatures above **230° Celsius / 446° Fahrenheit** nor glue with temperatures lower than **180° Celsius / 356° Fahrenheit**. This machine will only work correctly if the proper glue is used.

Proper glue should have an average temperature between **180° to 230° Celsius / 356° to 446° Fahrenheit** and be pellet glue. We recommend the following glues:

- **Jowat (ref. 280.30)**
Process Temp 180 - 200° C

- **Kleiberit (ref. 779.6)**
Process Temp 200 - 210° C

Any brand of pellet glue with temperatures between 180° to 230° Celsius / 356° to 446° Fahrenheit

You can use glue from other brands as long as it has an average temperature rating between **180° to 230° Celsius / 356° to 446° Fahrenheit** and as long as it is pellet glue. **Damage as a result of incorrect glue may result in the warranty being voided.**
