

R132 3 SPINDLE HORIZONTAL BORER

The Ritter R132 is a robust, triple spindle horizontal borer, known for being a workhorse in the shop. The many uses of this machine include stile and rail drilling, furniture doweling, line boring, table pin locating, and other functions for the clean and accurate drilling of wood components. Stile and rail boring set-up features help eliminate costly mistakes, rejected parts and increase production efficiency. The workpiece is held firmly against the table by a pneumatic clamp, and there is full adjustability of the index stops, table height, and depth of cut.

Designed for a dedicated and accurate boring center with single, double or triple spindle boring capability.

Machine Features

- Triple Spindle Gear Driven Drill Head
- 32mm Spindle Spacing
- 10mm Bored Female Collets With Set Screw Lock
- 0.75 HP Spindle Drive Motor, TEFC
- 0-2" Adjustable Boring Depth
- (4) Material Positioning Stops
- 2" Bore Clamping Cylinder
- Foot Actuated Boring Cycle
- 3450 RPM Spindle Speed
- 6" X 20" Table Area
- Tooling Not Included
- Electrical: 110V 10A
- Air: 2 CFM at 80 - 100 PSI
- Work height: 40"
- Footprint: 24" x 24"
- Table Area: 15.75" x 23.75"
