3" X 4" SANDERS

SurfPrep's 3" x 4" Air & Electric Surge Sanders have a low profile, compact footprint designed for use on flat surfaces, recessed corners, inside drawer boxes, profiled moldings, etc. The durable, lightweight nylon composite bodied sanders withstand rugged industrial applications and are excellent for both prep & finish sanding. Both the Air and Electric Surge can be converted into a more "aggressive leveling sander" with the simple addition of a pad saver with SurfPrep Film cut sheets. All OEM parts are available.

3" X 4" AIR SANDER

10,000 RPM Orbital / 3mm Orbit

Available in Self Generated & Central Vacuum

CFM: 3.1

SCFM: 16

PSI: 90

SPS3X4	SurfPrep 3" X 4" 10,000 RPM Orbital Sander (Hook & Loop Backup Pad)
SPS3X4CV	SurfPrep 3" X 4" 10,000 RPM Orbital Sander (Hook & Loop Backup Pad) Central Vacuum
SPS3X4SGV	SurfPrep 3" X 4" 10,000 RPM Orbital Sander (Hook & Loop Backup Pad) Self Generated Vacuum

Surfprep's 3" x 4" Electric Sander offers a compact footprint designed to sand into tight areas and corners effortlessly. It is power packed and energy efficient with the lowest energy demands over any other electric sander. The annual electric bill for running Surge 4 hours/day, 240 days/year is less than \$7.00! The Surge can travel the world unlike air sanders. The tool is equipped with durable electric connections, two CPU boards and a powerful 'outer runner' industrial grade motor. Its proprietary housing design with a built in cooling fan prolongs the life of the tool. Operational speeds of 7,000-9,000 RPM for customized finish. Available in Central Vacuum.

3" X 4" ELECTRIC SURGE SANDER

7,000-9,000 RPM Orbital / 3mm Orbit

Available in Central Vacuum

5" & 6" TRIDENT SANDERS

SurfPrep's NEW 5" and 6" Trident Sanders are designed with a durable composite body. They are lightweight with a compact, recessed throttle lever. It is ergonomically balanced for added comfort and control for the operator. Its cutting edge 'cooling fan' creates air flow around the counter balance spindle bearing which enhances the life of the tool. The Trident motor assembly is constructed of hardened steel for the cylinder and both end plates. A 360° swivel exhaust grate allows operator to redirect air flow. This new design no longer has an external cap/filter to lose or damage. The tool also has a redesigned, low-profile speed

5" & 6" ELECTRIC SURGE SANDERS

Surfprep's 5" & 6" brushless electric sander is the lowest profile, operator friendly, power packed, energy efficient random orbital sander that weighs only 2.5 pounds. The Surge Sander allows operators to sand 'on-site' because the tool plugs directly into a standard electric outlet. The power supply is built in the tool with a 'direct wire' design that allows for easy set up and operation (no external power supply box / plugs directly into outlet). Annual electricity costs for operating the 5" or 6" Surge 4 hour/day, 240 days/year is less than \$20.00. These tools are available in 3/16" & 3/32" orbits. Central vacuum option available to maintain a clean working environment. The rate of cut & power of the Surge puts the sander in a class of its own!

4 Speeds 4,000-7,000-9,000 & 10,000 RPM / Random Orbital - 3/16" or 3/32" Orbit

BACKUP PADS

Hook & Loop

Original Hook & Loop Backup Pads are excellent for 'quick release' of SurfPrep Foam. Attach Pad Saver to use with Film.

J-Hook & Loop

The J-Hook is a longer hook design that works well with SurfPrep Interface Pads, Film, Paper & Non-Woven Discs/Pads.

PSA

To be used with "Pressure Sensitive Adhesive" backed abrasives (sticky backed abrasives) for flat sanding.

Vortex

Built in air fins create 'positive' air flow, reducing dust & heat build up near lower motor assembly & enhances bearing life.

Soft Flex Edge

Soft Flexible Edge Pad allows relief for sanding profiled surface areas.

Product Innovation & Productivity
in Sanding

The SurfPrep Sanding System has “brought the fun” back into sanding. When one thinks about sanding, they usually don’t think “fun”...sanding isn’t fun; however, SurfPrep has reduced and eliminated what has always been a sanding department’s most mundane, boring, time-consuming task. Although sanding and preparing a surface is a critical step, doing so with SurfPrep makes for a better overall quality finish. SurfPrep has fine-tuned its variety of sanding systems by adding new products to the kits. During thousands of technical visits to woodworking manufacturers in North America, our team discovered areas in production that would benefit with a larger variety of foam abrasives and accessories. These products are minimizing physical effort and discomfort which maximizes efficiency in production lines from beginning to end; white wood to stain. Each kit comes with a SurfPrep Sander, 12’ Air Hose, Variety Packs of both Foam & Film as well as specialized accessories.

PREMIUM FOAM ABRASIVES

Foam abrasives are ideal for a multitude of applications and have greater efficiency, speed and effectiveness when compared to traditional sandpaper sheets. With today's technology in abrasive grains, flexible adhesives, foam densities and thicknesses... SurfPrep foam abrasives are the ultimate alternative to conventional sandpaper. With regular sandpaper, abrasive grain is coated directly onto the backing (paper, cloth/polyester or film). When coated onto one of these backings the grain is not able to flex/recess into the backing, causing the grain to re-fracture and wear away prematurely. Coating grain directly onto a solid substrate causes heat build up on the surface of the part being sanded. This excessive heat causes the coating being sanded to gum up (load or pill) and transfer to the abrasive, decreasing its life. Dixon's entire offering of SurfPrep foam abrasives are manufactured with premium abrasive grains and flexible adhesives that are coated directly onto the surface of the foam. Our unique method of coating, in addition to the use of "solvent free" adhesives, is a contributing reason for the elimination of heat build up at the point of contact and extends the life of Dixon's foam abrasives as much as 10X and more over conventional sandpaper. The magic of SurfPrep happens when a user puts our abrasive on a tool. SurfPrep has done what no other product has done before... tool sanding in the place of hand sanding. The flexibility of the foam in conjunction with the perfect orbit of our sander allows for a flawless finish. SurfPrep foam abrasives are available in vast range of sizes, grits, densities and can be used with air or electric tools on a large variety of surfaces/applications.
