- 7) Dust Kit (vacuum not included)
- 8) Backer Board with Magnets for Easy Removal
- 9) Midway Fence Flip Stop
- 10) Saw Blade and Router Bit for ACM Cutting (Not Shown)

The SR5A is a vertical panel saw and router all in one. Engineered with efficiency in mind, the router can be switched over to a saw in less than one minute. The router head has depth adjustment and a floating feature that gives you an accurate depth of cut every time. This unit is also equipped with industry specific accessories making it the ideal tool for cutting and v-grooving aluminum composite material. It also features a midway fence which makes smaller panel processing much easier.
